

# Innovative Graphite Materials For Building Applications

NeoGraf Solutions, LLC manufactures a wide variety of graphite products used in the building and construction industry. We have the knowledge and expertise needed to help you integrate graphite materials into your building construction products. From performance enhancements to customized solutions to quality products, we have the materials and expertise needed to help you bring new innovative products to the market.

## Performance Enhancements

Graphite flakes and powders are used to enhance the performance of a variety of building products. NeoGraf designs solutions to increase performance parameters such as R-value, water vapor transmission, and fire retardancy. Graphite is also non-halogenated and meets Global Warming Potential (GWP) standards. Below find a list of product categories that have successfully used graphite in their formulations:

- Rigid Insulation Boards
- Fire-stop Caulks
- Fire-rated OSB Boards
- Modified Bitumen
- Intumescent Coatings
- Flexible and Rigid Foams

## Custom Design Solutions

NeoGraf's engineers and scientists have the in-house expertise to integrate graphite materials into your next product formulation. NeoGraf develops customized solutions designed to meet your specific needs. We can help you incorporate graphite as a stand alone solution or a synergistic package to enhance your existing flame retardant systems.

## Commitment To Excellence

NeoGraf Solutions is the only US manufacturer of graphite flakes and powders. Our ISO 9001 certification ensures you will receive a consistent graphite solution that is designed to work with your products. Our long history of leadership in technical solutions assures an established and consistent supply of raw graphite direct from the mine source.

LEAD. CREATE. CONNECT.
